

EXHAUST SEALER

EXHAUST SEALER

DESCRIPTION

EXHAUST SEALANT is a sealant for sealing assembly and exhaust pipes. Prevents leakage and facilitates subsequent removal.

The sealant hardens with heat from the exhaust gases and resists temperature of 1000 ° C.

APPLICATION

Apply sealant on the "male" part of the joint and installing the exhaust pipe as usual.

We do not recommend applying sealant to joints collectors.

Ref.: 12232 Capacity: 100 g.

FEATURES

FEATURES	METHODS	SPECIFICATION		
		MIN	TYPICAL	MAX
